

7-10 days Luxaflor Roses

Report number:	20180115	Checked by:	Christa Vermeer
Date report:	2019-02-08	Shipment:	Januari - Februari, 2019
Date assessment:	2019-02-08	Client nr:	50000223
Location:	FlowerWatch		

Simulation:

The roses are brought to FlowerWatch on the 28th of January, 2019
Then the flowers are placed in the coldstore for 1 day at 2-5°C

Start test on the 29th of January, 2019

Flowers in this report were judged at the start of the test (after the simulation) and on day 7 and 10 according the following criteria:

Start test:

- 2: All roses are good
- 5: One or more written off stems (botrytis)

Day 7:

- 1: 100% OK, including a 100% good bud opening
- 2: 10% (or less) of the vase/stems is written off
- 3: 11% - 25% of the vase/stems is written off
- 4: 26% - 50% of the vase/stems is written off
- 5: > 50% of the vase/stems is written off

Bud opening is judged after 7 days of vaselife according the following criteria:

(We do not write off on bud opening)

- 1: 100% of the bunch opens good (FWV 1)
- 2: Average bud opening (FWV 2)
- 3: > 75% of the bunch does not open or opens poor (FWV 3)

The write off criteria are judged as follows (day 7):

- 3: Between 0% - 25%
- 4: Between 26% - 50%
- 5: >50%

The test:

10 days on flowerfood , with a relative humidity of $\pm 50 - 70\%$, at an average temperature of 20°C, 12 hours light and 12 hours dark.
